

Gräbert ARES® Commander

Gräbert⁺

The Trinity of CAD
Desktop - Mobile - Cloud

Much more than a cost-effective CAD Software for dwg editing, ARES Commander brings your productivity to the next level with smart productivity features and a unique concept: **The Trinity of CAD™**.

The **ARES Trinity of CAD Software** combine the best of what each platform has to offer: Desktop, Mobile and Cloud are combined into a unique user experience generating high synergies across all your devices.

The highly flexible licensing of ARES Commander allows the same user to work from several computers under Windows®, MacOS® or Linux®. Each license includes also a 1 year renewable subscription for ARES Touch™ and ARES Kudo™.

Gräbert ARES® Touch

ARES Touch: The perfect companion for your mobile devices

Subscribers of ARES Commander can enjoy ARES Touch on all their mobile devices at no additional cost. With more than 150 CAD features, ARES Touch is the most advanced Mobile CAD solution currently available for Android and iOS.

Fully integrated with ARES Commander and ARES Kudo, ARES Touch is the perfect companion to read, annotate, create and modify DWG drawings on the go. ARES Touch is making no compromises in features to create or modify 2D drawings in DWG.

Some of the most acclaimed features of ARES Touch include also the ability to annotate drawings with pictures taken on site or by recording your voice. The new FREESKETCH command offers also a very intuitive way to redline or comment drawings with your fingers like a pen on paper.

ARES Kudo brings the agility of Cloud to ARES Commander and ARES Touch

ARES Kudo is a cloud-based CAD solution for DWG viewing and editing. It runs in your Internet browser via a simple URL. ARES Kudo connects to all your cloud storages such as Google Drive, Dropbox, Box but also Onshape or Trimble Connect. ARES Kudo behaves like the hub for all your DWG files: your DWG files follow you on any device, anywhere, without the hassles of installs or updates.

ARES Kudo is also fully integrated with ARES Commander and ARES Touch. Any modification you make on one device is instantly synchronized on all your devices and with all the contacts with whom you are sharing this project. You can start a project with ARES Commander, ARES Touch or ARES Kudo and continue it on other devices, ARES Kudo will make sure your files follow you and are always up-to-date.

ARES Commander's Cloud storage palette to synchronize files is powered by ARES Kudo

ARES Kudo is also capable to generate a view-only link that you can share with your contacts. This unique sharing feature allows them to see your file online for free inside ARES Kudo's viewer. Besides, when they will open this URL they will always see the latest state of your project and you can cut access at any time.

ARES Kudo is also included in the subscription of ARES Commander as part of Graebert's unrivaled Trinity of CAD software. When you buy ARES Commander you get therefore much more than a suite of three products for CAD in dwg. You get a unique ecosystem that will considerably improve your productivity and workflows.

Don't miss our video to understand how these three solutions are working together to improve your workflows:
